THINGS YOU CAN DO TO SAVE THE EARTH

POLITEKNIK MALAYSIA

CONSERVE ENERGY AT HOME

Turning off lights and electronics when not in use, changing your air filter regularly, there are many things you can do to reduce greenhouse gasses.

By doing so you can reduce your electrical bills and save the planet.

FOLLOW THE 3-R RULES

Look for ways that you can Reduce, Reuse, and Recycle. You'll save energy and money, and you'll reduce waste sent to landfills.

GIVE YOUR CAR A BREAK

Ride a bike or take public transportation. You'll save money, reduce greenhouse gas emissions, and get healthier by exercising.

WAYS YOU CAN PREVENT FOOD WASTE

PLAN YOUR MEALS:
PLAN YOUR MEALS IN ADVANCE SO YOU CAN BUY ONLY THE INGREDIENTS YOU NEED. THIS WILL HELP YOU AVOID OVERBUYING AND PREVENT FOOD FROM GOING TO WASTE.

STORE FOOD PROPERLY:
PROPER FOOD STORAGE CAN HELP EXTEND THE LIFE OF YOUR FOOD. KEEP PERISHABLE ITEMS LIKE FRUITS, VEGETABLES, AND MEAT IN THE REFRIGERATOR OR FREEZER TO PREVENT SPOILAGE.

USE LEFTOVERS:
LEFTOVERS CAN BE A GREAT WAY TO STRETCH YOUR MEALS AND REDUCE FOOD WASTE. TRY INCORPORATING LEFTOVER INGREDIENTS INTO NEW MEALS, OR SIMPLY REHEAT THEM FOR A QUICK AND EASY MEAL.

COMPOST:
COMPOSTING IS A GREAT WAY TO RECYCLE FOOD WASTE AND TURN IT INTO NUTRIENT-RICH SOIL FOR YOUR GARDEN. IF YOU DON'T HAVE A COMPOST BIN, MANY CITIES OFFER COMPOSTING SERVICES.

DONATE FOOD:
IF YOU HAVE UNOPENED, NON-PERISHABLE FOOD THAT YOU DON'T PLAN TO USE, CONSIDER DONATING IT TO A LOCAL FOOD BANK OR SHELTER.

BUY IMPERFECT PRODUCE:
MANY GROCERY STORES NOW OFFER "IMPERFECT" PRODUCE AT A REDUCED PRICE. THESE FRUITS AND VEGETABLES MAY BE MISHAPEN OR HAVE SMALL BLEMISHES, BUT THEY ARE STILL PERFECTLY GOOD TO EAT.

BE MINDFUL OF PORTION SIZES:
WHEN PREPARING MEALS, BE MINDFUL OF PORTION SIZES TO AVOID OVER-SERVING AND CREATING FOOD WASTE. START WITH SMALLER PORTIONS AND ALLOW PEOPLE TO GO BACK FOR SECONDS IF THEY ARE STILL HUNGRY.

FIGHT FOOD WASTE

zero waste

Throwing out food is not only a waste of produce and your money. It's actually harmful to the environment. That's because when food breaks down, it creates methane gas.

FOOD FOR THOUGHT:
In some countries, approximately half of all the food produced goes to waste. There is enough food produced to feed everyone in the world. Food waste contributes to global warming.

LIVING A LIFE WITH ZERO WASTE

The average Malaysian throws away 1.6 kg of waste daily, compared to the worldwide average of 1.2 kg.

Malaysia's waste production will increase 50% to 77,000 tonnes per day by 2030.

TIPS TO REDUCE WASTE FOOD

- 1 USED LEFT OVER TO CREATE NEW RECIPE
- 2 BUY FOOD WITH LONGER EXPIRATION DATE TO EXTEND THEIR LIFE
- 3 CONSIDER BUYING CANNED PRESERVED FOODS INSTEAD OF FRESH TIMES
- 4 USE FOOD PRESERVATION TECHNIQUES SUCH AS VACUUM PACKAGING OR FREEZING TO EXTEND THE SHELL LIFE FOOD AND AVOID WASTE

"Trowing away food is stealing from the table of those who are poor and hungry."

FIGHT FOOD WASTE

5 EASY ACTION TO CUT FOOD WASTE

"Buy only what you need"

Plan your meals. Make a shopping list and stick to it, and avoid impulse buys. Not only will you waste less food, you'll also save money!

"Store food wisely"

Move older products to the front of your cupboard or fridge and new ones to the back. Use airtight containers to keep open food fresh in the fridge and ensure packets are closed to stop insects from getting in.

"Adopt a healthier, more sustainable diet"

Life is busy and making nutritious meals may be difficult, but healthy meals don't have to be complicated. There are many simple nutritious recipes on the internet that you may share with your family and friends.

"Love your leftovers"

If you don't finish everything, freeze it for later or use it as an ingredient in another dish.

"Sharing is caring"

Donate food that would otherwise be thrown away. Apps, for example, might connect neighbours and local companies so that leftover food is shared rather than wasted away.
